		EON	midata	.csv
		nPower	midata	.csv
		Scottish Power	midata	.csv
		SSE	midata	.csv

How do I download my energy consumption data?

There are two types of report that you can download from your energy provider:

1. Your **monthly/quarterly statement** of energy usage, normally in PDF or CSV format;
2. Your **midata usage summary** in .CSV format (NOTE: this is only available if you have been with your current provider for a year or more).

Download Instructions for Quarterly Statements

1. Log in to your energy account (e.g. SSE - <https://my.sse.co.uk/your-account/login>).
2. Find your statements to download. These can generally be found in 'My Statement' or 'My Bills' or 'What I've Used'.
3. They are usually available to download in .pdf though please download the .csv if given the option.
4. These are the files you should upload to the Digital Prosumer Platform ready for trading.

Download Instructions for Midata Summary

1. Log in to your energy account (e.g. SSE - <https://my.sse.co.uk/your-account/login>).
2. Navigate to the pages that display your usage (e.g. for SSE it is under 'What You've Used').
3. Find the links to download your Midata statements in .csv format.
4. This is the file you should upload to the Digital Prosumer Platform ready for trading.
